TIMELY TOPICS

CHURCH UNION

Some opinions have already been expressed by leaders of the Presbyterian church of Canada that the result of the vote by that body is not emphatic enough to warrant them bringing about the union at present. We do not know what authority that council may possess which led them to make such a decision. We quite ought that before any such decision was made by either body that the united council of the three churches would have met with the completed vote before them. At present the totals of the three churches are incomplete, and it is a great pity that any decision should have been made yet. Such a decision is indeed premature, and should not by any means be considered as final. Thus far the result of the Presbyterian vote is about 70 per cent. in favor and the Methodist and Congregational vote is over 80 per cent. in favor. Generally a two-thirds majority rules, and we do not think that any such premature decision as has thus far been made should have any effect upon the final issue. Western Canada has gone greatly in favor of the union. Conditions are so different in regard to most things in Western Canada to what they are in the east, that great consideration will have to be given to the western vote.

WESTERN DOMINATION

There are prophets who have declared that in a few years Western Canada will have a larger population than the east, and that politically, yes, and perhaps in most other directions the west will dominate in parliament, in trade and in influence. It looks as though there is something in the prophecy too. The Dominion government will do well to legislate not for east or west, north or south, to the exclusion of either, but for each and for all. Laws might be made for the east which work rank injustice when applied to the west, and to save the west retaliating when she gets the dominant power the east should be broad-minded and far-sighted enough to see what politics will work well for one without working ill for the other. The day will come when the west will submit no longer to being fleeced, either by railways, or manufacturers, or combines, or anything else. We would hate to see the west presently play the same game to the east, because the policy is altogether wrong, but we think it is time that wisdom was exercised.

HORSE MANIA

Calgary has recently been stricken with a temporary mania. The papers were infected by it and we were given to understand that "The horse is king." "There is nothing worth thinking about but the horse." "This is horse week," etc. No mistake, Calgarians know how to boost up their own city, and they seem to be able at short notice to take hold of a mad streak. Their recent land show was a case in question. But we wonder how many dollars changed hands as the result of bets at that recent

horse show.

THE GREAT HOME RULE BILL

We are somewhat indifferent at this distance from the Emerald Isle of the great issue that is before the Mother Parliament. We are apt to look upon Ireland as poor Ireland, and her earnest champions have not scrupled to give the impression that she is a down-trodden country under the iron heel of Great Britain. But that is not fair. Ireland has been as much cared for by the mother parliament as many parts of England. Indeed Ireland has received more consideration than many of the English problems. Ireland's greatest enemies are those within her own household. Whether Ireland has Home Rule or not she will never be free, never be prosperous while she is under the heel of a foreign power, which she is practically today.

SELECTING THE COW

FOR BEST PROFIT

The dairy cow must be able to consume large quantities of roughage, because the roughage is the cheapest part of the ration. "In order to produce large quantities of milk she must eat large quantities of food, or in other words be a good feeder. The large muzzle, head of proper proportions, great depth through the chest, and large size of barrel are indications of feeding capacity. The cow with the contracted muzzle, the narrow face and head, the shallow chest, the lack of "bread basket" is the cow that refuses to do her duty to the feed manger.

By constitution is indicated the power to withstand the severe strain of producing large quantities of milk as well as being able to produce offspring. In order to do these things the cow must have proper heart girth or space in which the vital organs can perform their duties. The strong, vigorous cow with large nostrils, the clear and healthful appearing eye, the deep chest and large barrel, is the cow of strong constitution. Cows weak in constitution have been found to be light feeders, easily thrown off feed, not persistent milkers and not economical producers.

Persistence in milk flow is one of the qualities which makes a profitable dairy cow. The cow that starts in at freshening time to produce 30 to 40 pounds of milk daily and fails to continue this flow for only a short time is not the persistent milker. To be profitable it requires a cow to give a large flow of milk during her entire lactation period.

Beef cattle will convert the food they receive into body fat. The best type of dairy cow will convert her food into milk and butter fat, and will even rob her body of fat in order to supply the pail. The type of cow that lays on fat instead of producing heavily is the undesirable type of cow for dairy purposes.

Regularity of breeding is another one of the requirements of a dairy cow in order to ensure the heaviest of milk production. Of course, farrow cows will be persistent in their milk flow, but they will not produce the maximum quantity.

Ducility is another of the important requirements of a good dairy cow. Ugliness and irritability are qualifications not at all desirable.

L. R. CASPELL

The term "dairy temperament" is applied to dairy cattle indicating strong vitality and recuperative ability, enabling the animal to maintain her productive powers. Such temperament is found in cows open in their skeleton framework, having much space between vertebrae of the back and between the ribs.

The mammary system is of utmost importance in considering the qualifications of a good dairy cow. The udder, the centre of milk manufacture, ought to be large and well balanced as to quarters, extending well in rear and forward on the abdomen; the teats of good size and squarely placed on the corners of the udder.

The udder must be well nourished with blood, which carries the nutriment portions of the digested food. This blood reaches the udder through the pelvic region, and is carried away by the milk veins which appear on the abdomen of the cow and enter the milk wells. Hence the size of milk veins and milk wells are indicative of the amount of blood that is passing away from the udder. The skin of the udder ought to be soft and the udder itself ought to be pliable.

The typical dairy cow combines feeding capacity, great constitution, and large milk production in a body of quality, full of nerves and not disposed to lay on fat during the production period.

Eat What You Like

And What Agrees With You, But Do Not Eat Too Much
Digestion Will be Good if You Regulate the System With

DR. CHASE'S KIDNEY & LIVER PILLS

Overeating is the great cause of liver trouble, biliousness and constipation. The digestive system becomes clogged with poisonous waste matter, the liver fails and then follow kidney disorders of the most painful and fatal form, such as rheumatism, Bright's disease and dropsy.

The beginning is almost invariably of the liver and should be overcome by the prompt use of Dr. Chase's Kidney & Liver Pills before serious disease is developed.

An occasional dose of Dr. Chase's Kidney & Liver Pills when the liver gets sluggish and the bowels constipated in healthy working order.

Hundreds of thousands of people have found this cure for all liver trouble and would not think of being without this medicine in their homes. Others have been restored to health by this treatment after the liver had reached more serious and complicated stages.

There does not seem to be any successful obtainable which is so successful in awakening the action of both liver and kidneys as Dr. Chase's Kidney & Liver Pills. Many cases can account for their enormous sales.

Dr. Chase's Kidney & Liver Pills, a dose, 25c a box, all druggists, or J. H. Johnson, Lakes & Co., Limited, Toronto.

The Beaten Path

Bergantini—Why do you think this dose was stolen from a lady?

Polemann—Because it was walked down the street with it. It stopped in front of all the department store windows.

A MODERN MEDICINE FOR THE BABY

What mother cannot remember the times of her childhood when the doctor of the village was brought into the house and she looked forward to a dose of the little white pill upon which she relied. Surely all mothers will be glad to spare their little ones this discomfort—this dread medicine, which has been the cause of so much suffering and has been the cause of so much suffering and has been the cause of so much suffering.

"I wonder if your sister remembers, Johnny, that during the last three months I have spent many dollars in sweets on her?"

"I am sure she does, Mr. Sweetie; that's why she's not letting on she's engaged to Mr. Brigger."

Minard's Liniment Cures Dandruff

Teacher—"What is a man-of-war?"
Boy—"A cruiser."

Teacher—"What makes it go?"
Boy—"It's crew."

Teacher—"Who are on board her?"
Boy—"It's crew."

Teacher—"You're a very smart boy. Where were you born?"
Boy—"Crew, sir."

The following conversation followed a banquet recently held:

Minard—"Was your banquet a success?"

Glady—"Yes, indeed, the minister will have cause to be very grateful."

Minard—"How much were the profits?"

Glady—"Nothing. The expenses were more than the receipts. But the lot of us engaged, and the minister is in for a good time in wedding fees."

QUEER WEATHER DEVICES

Nature Has Furnished Many Simple But Interesting Ones

One of the oldest and simplest ways of telling whether the air is dry or moist is to suspend a piece of seaweed out of doors, or even in an apartment where there is no artificial heat. The weed is crisp and dry at the approach of fine weather, while it is flaccid and moist when rain is likely.

In common use, the Syrian weather-house is really quite trustworthy in its forecasts. The woman of the house is seated on the little house in fine weather, while the man comes out in wet conditions are to be expected.

In a medium state of the atmosphere both figures stand just inside the house. The man comes out in the twisting of a cord of catgut, a substance which is highly sensitive to changes in the humidity of the air.

Two very singular weather devices are those in which a frog and a leech are employed. In the former case a glass jar is filled about two-thirds with water. A small frog is placed in the jar. In stormy weather, however, the frog will remain in the water.

A frog will live happily in such a jar for a few weeks, and it will be found that in fine weather the frog will climb out up to the top of the ladder. In stormy weather, however, the frog will remain in the water.

Even more reliable as weather prognosticators are a single leech. A single leech is placed in a broad glass bottle with a perforated bladder or leather over the mouth. On the approach of rain or frosty weather the leech remains almost motionless, curled up at the bottom. When rain is coming the creature stretches out to the surface, which a coming thunderstorm will alter.

At times the leech will even leave the bottle altogether. It is sensitive to the animal to an electrical disturbance.

The chameleon barometer is a curiosity which has puzzled many people. Its construction is really very simple. The animal changes color in variable degrees of the weather, being pink in damp conditions, purple in a variable degree, and bright white when the air is dry.

A cardium meter is prepared, and this may be jettisoned in sections. Fair, storm and change. The chameleon barometer is a curiosity which has puzzled many people. Power of the Potato

Potatoes will keep the power of driving all kinds of engines.

How can they do this? By the alcohol which can be extracted from each potato.

Alcohol, or spirit, is produced by the fermentation of sugar. Potatoes contain a large amount of starch which can be turned into sugar by the addition of malt. When the starch has been converted to sugar, yeast is added and the sugar is then fermented.

In process, potatoes are worth roughly speaking, 35 cents per bushel, but turned into spirits they would be worth over ten times this amount.

It is estimated that a plant with a large consumption of electricity, thousands of potatoes would cost approximately \$12,000.

A thorough trial—to test the stomach and bowels of impurities and irritants is necessary when their action is irregular. The pills that follow this work thoroughly are Parnell's Purgative Pills, which are sold in action but might in results.

The pills are effectively and work a permanent cure. They can be used without fear by the most delicate of constitutions, and to the painful effects preceding their gentle operation \$12,000.

"What seems to be the matter with him?" asked the doctor as he approached the bedside of the man, who lay in bed in bed.

"He found the bundle," briefly explained the nurse.

Shiloh's Cure

Wet, cold, cough, cold, croup, hoarseness, asthma, etc.

A very valuable remedy was sent to a barber shop in Ottawa, and plunging himself down in the chair, said, "Cut."

The barber looked at him for a moment and then replied: "Why, man, you don't need a hair cut. What you want is a shave."

CANADA BEATS THE UNITED STATES

MORE HONORS FOR GIN PILLS

"Having taken two boxes of your excellent GIN PILLS, they relieved me of my chronic constipation, and with the results. I gave an order to my druggist to send up this medicine to me some more. Nothing has done me so much good."

A friend of mine who is also using GIN PILLS. I have none left and am sure to order more. I have found that I would ask you to send at once to me some more so well when I am without GIN PILLS."

GIN PILLS must be good when people in Massachusetts send all the way to New York to get a box of GIN PILLS. I have none left and am sure to order more. I have found that I would ask you to send at once to me some more so well when I am without GIN PILLS."

Alcohol, or spirit, is produced by the fermentation of sugar. Potatoes contain a large amount of starch which can be turned into sugar by the addition of malt. When the starch has been converted to sugar, yeast is added and the sugar is then fermented.

In process, potatoes are worth roughly speaking, 35 cents per bushel, but turned into spirits they would be worth over ten times this amount.

It is estimated that a plant with a large consumption of electricity, thousands of potatoes would cost approximately \$12,000.

A thorough trial—to test the stomach and bowels of impurities and irritants is necessary when their action is irregular. The pills that follow this work thoroughly are Parnell's Purgative Pills, which are sold in action but might in results.

The pills are effectively and work a permanent cure. They can be used without fear by the most delicate of constitutions, and to the painful effects preceding their gentle operation \$12,000.

"What seems to be the matter with him?" asked the doctor as he approached the bedside of the man, who lay in bed in bed.

"He found the bundle," briefly explained the nurse.

Shiloh's Cure

Wet, cold, cough, cold, croup, hoarseness, asthma, etc.

A very valuable remedy was sent to a barber shop in Ottawa, and plunging himself down in the chair, said, "Cut."

The barber looked at him for a moment and then replied: "Why, man, you don't need a hair cut. What you want is a shave."

CANADA BEATS THE UNITED STATES

MORE HONORS FOR GIN PILLS

"Having taken two boxes of your excellent GIN PILLS, they relieved me of my chronic constipation, and with the results. I gave an order to my druggist to send up this medicine to me some more. Nothing has done me so much good."

A friend of mine who is also using GIN PILLS. I have none left and am sure to order more. I have found that I would ask you to send at once to me some more so well when I am without GIN PILLS."

GIN PILLS must be good when people in Massachusetts send all the way to New York to get a box of GIN PILLS. I have none left and am sure to order more. I have found that I would ask you to send at once to me some more so well when I am without GIN PILLS."

BANK OF HAMILTON

CAPITAL PAID UP.....\$2,500,000
Reserve and Undivided Profits.....3,500,000
Total Assets.....4,000,000

THE incentive to thrift that a saving account gives you is even more valuable than the actual interest that accumulates upon the deposit. The habit of saving—acquiring comfort in old age—is easily acquired as the habit of spending. Banking service in the Savings Department of the Bank of Hamilton is as sincerely offered to the man who deposits a few dollars a month as to those who deposit thousands.

Cayley Branch, JAMES LYALL, Agent

These Fine Warm Days

Are putting new life into all kinds of industry. Farmers are preparing for seedling. Mechanics are at work repairing houses and barns. With it all comes a demand for HARDWARE. We are prepared for all requirements with a complete line of

Heavy and Shelf Hardware

Come in and see

ELVES BROS. Hardware and Furniture

Now is the Time

To get your old Harness repaired and ready for Spring. Work, or those in need of

New Harness

would do well to call and see our Harness and give us an order, where you get satisfaction, both in quality and price.

Local News

Watch Cayley grow.

Subscribe now for the Hustler. For first class job printing try the Hustler.

The many friends of Mr. Willard Barker are pleased to see him back to Cayley again.

The members of the Methodist choir are asked to kindly remember their practise on Friday night.

Mr. and Mrs. Custer are visiting their sister, Mrs. Chas. Gardner.

Mr. Ferris has purchased the quarter section of land from Mr. John Marth east of F. H. Walker's.

Mr. Jessie has been appointed C. P. R. agent here, to take the position made vacant by the resignation of Mr. Wm. Allan.

The painters are busy at the C. P. R. station. They intend to paint both the inside and outside of the building.

Mr. and Mrs. Geo. Walker of Reid Hill have taken up their abode about two miles north of the town for the summer.

Miss Cora Barker, who has been at Red Willow for the past few months, returned home last week.

Mr. R. J. Barker and daughter are the guests of W. E. Barker. Mr. Barker is the father of W. E. We are glad to report they found Willard on the road to recovery.

Mr. A. Thomson of Stately occupied the pulpit of the Presbyterian church on Sunday morning last. The evening services will be discontinued until further notice.

Among the names of the contestants in district No. 5 in the Calgary News-Telegram circulation competition, we notice the name of Miss Mary Barnes of Cayley. Our young ladies have been successful candidates in newspaper contests before, and we hope to see Miss Barnes' name at the head of the list.

It is reported from Toronto that although the general vote of the Presbyterian church was not adequate to warrant the union between the Methodist, Presbyterian and Congregational churches of Canada at the present time, the Methodists are not backing away from the amalgamation. They are continuing their vote as if the Presbyterians had voted unanimously for the project.

Mr. Wm. Hicklin left Thursday for his homestead.

Frank merchants are moving to Bellevue.

Thos. George of Ontario is visiting his brother, H. E. George.

Quite a number from here attended the horse show at Calgary this week.

The exams of the Teachers' Training Course will be held in the near future.

Owing to the inclemency of the weather threshing and seeding operations were greatly delayed.

Miss Kyle has accepted the Braemar school, south of Cayley. Duties started April 1st.

Mr. Glendenning loaded several carloads of cattle this week for the Coast.

The funeral of Mr. Vance's baby was largely attended last Thursday. Rev. Mann officiated.

A. A. Stevens has returned from Victoria, B.C. Reports everything good.

Mr. Schwoeb left Wednesday to take up his abode in High River. The best of friends must part.

Mr. W. H. Kitchen has returned to Cayley after spending the winter in Oklahoma, U. S. No place like Cayley after all.

Mr. Barnes gave a very interesting address last Sunday evening on the subject, "How to study the bible."

Willie Carr has returned from LetbrIDGE, where he has been working. About a week is all Willie can stand from Cayley.

A flurry of snow surprised our citizens Thursday. The winter seems loath to leave us, but it's got to go.

It looks as if the Hustler's kick on the question has taken effect. Grain cars coming in very good this last week.

Mr. Chas. Gardner believes in making use of his engine when he can. He has been hauling several loads into town with the engine.

The supposed debaters for Thursday last must have decided that "Coal is coal and 'Wood is wood.'" The school-marm says "wood" (stick), he can't get along without it. The blacksmith says "coal," he can't get along without coal.

What does The Hustler consider a fair wage for a "lamp lighter?" Cayley wants one. Our lamps have not been lighted for several nights. Our answer to this query would be "Pay a wage that will make it worth while for a man to attend to the duty properly."

The football match of Monday last week, Cayley vs. High River, resulted 1-1 in favor of Cayley. Owing to the high wind neither team had a chance. The Cayley Hustlers must get busy for this week's game. Line up as follows: Grant, Douglas, Jones, Vinnie Caspell, Caspell, Douglas, Newton, Hoshburgh, Caspell, Dickie, and Urquhart. A Durham referee.

What is eternal punishment? This subject will be dealt with by the Rev. O. E. Mann on Sunday next. This is a question that ought not to be ignored. We are ready to accept the promise of eternal happiness, and we all hope to enter into it at the close of our career on earth. But what about the other alternative? As true as there is truth and purity and goodness, so true will there be a heaven. So also, as true as there is injustice, sin, crime, filthiness, wickedness unpunished in this world, so true will there be a hell.

At the annual meeting of the license commissioners to be held throughout the province during the month of May, 260 applications will be brought before the board, either for renewals or for new licenses. In spite of the vast increase in the population of Alberta during recent years, the number of licenses has remained stationary, the new licenses granted being practically offset by old licenses which have been cancelled or allowed to lapse. Last year 247 licenses were granted, and when this year's list has been considered it is possible that no increase will be shown. Among the 260 are a considerable number of applications for new licenses.

Get a Separator

No dairyman afford to be without a separator. A separator will remove practically all the butter fat from the milk, while the old method of skimming may leave as much as 25 per cent. of all the butter fat in the skim milk. Butter fat is certainly too expensive for hog food. Any good hand separator will leave less than five one-hundredths of one per cent. of fat in the skim milk and thus effect a saving of from \$4.50 to \$6.00 per month per cow over the old fashioned gravity systems of creaming. In addition to this it will be well to bear in mind that with a hand separator a richer and better cream can be skimmed and that the skim milk can by this system be fed immediately while still in a warm, sweet condition.

In selecting the separator the farmer should use the same good judgment that is necessary in the selection of any kind of machinery. Durability, ease of running, ease with which they are cleaned, are points of primary importance in buying a new separator. The dairyman cannot afford to take chances with a poor and cheaply constructed separator.

To Prevent Grain Blockade in 1913

Better Facilities at Head of Lakes—O. T. P. and H. B. Railway Will Help

The government's plan to prevent repetitions of the western grain blockades is a new outlet which will double the size of the grain spout this fall and two by the fall of 1913.

The western end of the Grand Trunk Pacific, from Winnipeg to Cochrane, Hon. Frank Cochrane believes, will be completed by autumn. The following year he also hopes to have the Hudson Bay railway completed to the west and the terminals and docks far enough advanced that part of the crop can be shipped to Europe by the new route.

The section from Winnipeg to Lake Superior has been completed for some time, but it afforded no relief last fall, as grain could not get past Fort William, the head of congestion. The Transcontinental from Moncton to the Quebec boundary is also ready to be taken over, as is the section westerly from Quebec city, 350 miles. Reports indicate very satisfactory progress in construction work all along the line.

Wanted

A live representative for CAYLEY, ALBERTA

and surrounding district to sell Hardy Nursery Stock for "Canada's Greatest Nurseries." Splendid list of hardy varieties, tested and recommended by the Western Experimental Stations. Send for terms and circulars showing what we have already done in Manitoba, Saskatchewan and Alberta for weeks. Free outfit and complete territory.

STONE & WELLINGTON, Foresters, Ont.

DROPS OF WATER.

Thereupon a Red-hot Devil, They Will Never Touch It.

It is impossible to have a few drops of water on a red-hot stove. The water can never touch the stove at all. What is seen is a few drops rolling rapidly over the surface, gradually getting smaller until they disappear. If the drops are on a perfectly level place one can see under them to the other side of the room, thus proving that they are not in contact with the stove itself.

What actually happens is that the bottom of the drop changes at once to steam or vapor on coming close to the hot surface, and this vapor is supplied by the drop as it gradually goes away. So the drop rests on a cushion of vapor until it is entirely dissipated. This state of water is known as the spheroidal state and is of interest simply on account of its peculiarity and seemingly paradoxical behavior.

The reason why the drop is not immediately evaporated or changed to steam is also very interesting. The water vapor thus interposes between its under surface and the red-hot stove in a very bad conductor of heat, and consequently the full intensity of the heat cannot get to the water itself, but the amount transmitted through the vapor being available for this purpose.—St. Louis Republic.

Japanese Traits.

In a country like William Morris' golden rule, "Have nothing about you but what you know to be useful and believe to be beautiful" so scrupulously followed as in Japan. The politeness of the Japanese—a sign of "equality"—the politeness of this hierarchical case is in surprising contrast with the aggressive rudeness of our democratic communities. Gentleness and cordiality are the Japanese rule; no scenes of violence. The readiness with which Europeans enter into a passion stupefies the Japanese, appears to them to be a sign of lunacy. In his conferences, the Japanese offers to others a Japanese habitually refrains from making any show of his personal resources. Only his really has the Europe to fancy that the Japanese regard western civilization as superior to their own and that therefore they are "Europeanizing" themselves purposely. The western diplomat has described modern Japan as a "half translation" of Europe merely along the definition and concept of foreignness generally.—F. Chailley in News & Parts.

Waxen Residue.

To extract the essence from any flower place a layer of the flowers in a jar, then pour over them not more than one inch of wax. Repeat the process until the pot is filled, cover closely and place in the cellar. Forty days afterward strain the essence from the whole through a cage by pressure. Put the essence thus expressed in a clear bottle and expose for six weeks to the rays of the sun and evanesce to purify. One drop of this essence will communicate its odor to a pint of water.

SEED GRAIN FOR SALE

I have for sale a quantity of Silver Mine Oats, cleaned, germination test 76, also purebred, also Preston Wheat at 75c per bushel.
